Success Stories

Discover how our customers and partners are achieving remarkable results with our solutions and support.

Rapid Development and Procurement of a Raw Material for Lipid Production by Matrix Fine Chemicals

In response to the urgent global need for COVID-19 vaccines, Matrix Fine Chemicals undertook a critical project to source and develop a raw material essential for lipid production. This case study examines the swift actions taken by Matrix Fine Chemicals to find a manufacturing partner and develop the required raw material within a short timeframe.

Temporary Procurement Solution by Matrix Fine Chemicals

Matrix Fine Chemicals undertook a project to provide a temporary procurement solution for a client facing supply chain disruptions. This case study explores the strategic approach taken by Matrix Fine Chemicals to ensure the client's operations continued smoothly during a critical period.

Procurement of a Bio-based Raw Material by Matrix Fine Chemicals to the pilot plant at Anonymous

Matrix Fine Chemicals and an anonymous company (hereinafter referred to as Anonymous), two leading companies in the chemical industry, embarked on a significant project in 2010. Known for their innovative approaches and commitment to sustainability, they collaborated to procure a specific bio-based raw material. This case study explores the procurement process, challenges, strategies, and outcomes of their collaboration.

CDMO Customer - Sourcing Project

This case study details a successful sourcing task undertaken by Matrix Fine Chemicals in Flums, Switzerland, for a larger CDMO, located in Switzerland. The company required a complex starting material for their pilot plant. This case highlights Matrix Fine Chemicals's expertise in sourcing hard to find chemical meeting stringent a strict impurity profile.

Pharma Customer - Custom Synthesis Project

This case study details a successful custom synthesis project undertaken by Matrix Fine Chemicals in Flums, Switzerland, for a mid sized pharmaceutical company, located in Germany. The company required the synthesis of a novel and complex intermediate compound crucial for their development of a new drug candidate. This case highlights Matrix Fine Chemicals's expertise in complex organic synthesis, process development, analytical capabilities, and commitment to meeting stringent quality and timeline requirements.
